PROFESSIONAL SUMMARY

Frontend-focused Fullstack Developer with 5+ years of experience building modern, accessible, and high-performance web applications. Specialized in modern frontend frameworks (Angular, React, Svelte, Astro), reusable component design, and styling with TailwindCSS/SCSS. Proficient in backend architecture (NodeJS, Express, Python, Django, Java, Spring Boot) and DevOps automation (Docker, GitLab CI/CD pipelines, AWS). Proven track record of optimizing high-traffic web platforms, standardizing UI architecture across multi-project environments, and reducing page load times by up to 75%.

TECHNICAL SKILLS

Frontend:	Angular, React, Svelte, Astro, TypeScript, JavaScript (ES6+), TailwindCSS, SCSS, CSS3, HTML5, Bootstrap
Backend:	NodeJS, Express, NestJS, Python, Django, Wagtail, Java, Spring Boot, PHP, Laravel
Cloud & DevOps:	GitLab CI/CD Runners, Docker, AWS (EC2, ECS, ECR, S3, RDS, SDK), Kubernetes, Bash, Linux (Ubuntu), Apache2, OpenTelemetry
Databases & Tools:	PostgreSQL, MySQL, Redis Caching, Git, GitHub, GitLab

PROFESSIONAL EXPERIENCE

Systems Specialist / Lead Developer — Secretary of Administration Guadalajara, MX | 2023-03 – Present

- Architected a standardized frontend project template and reusable component library currently adopted across 6+ major active projects, accelerating team development velocity and UI consistency.
- Developing a core administrative management platform to digitize and track official government communications (oficios) for department directors, unifying inter-departmental workflows.
- Led end-to-end development for 80+ government informative websites, collectively handling 50,000+ daily visits with high reliability and accessibility.
- Automated DevOps workflows for 80+ sites by building CI/CD pipelines with GitLab Runners, automated database backups, and structured Docker image versioning for seamless releases.
- Optimized web application performance, reducing page load times from 12s down to 3s by implementing request caching strategies and reducing database queries from 700 to 120 per request.
- Engineered an internal management platform for 80+ sites and AWS S3 buckets, alongside a central Google Analytics platform to aggregate async/sync performance data into executive dashboards.
- Designed and built a unified Applications Hub portal allowing officials to manage tasks, receive real-time notifications, and process permit approvals in a single interface.

Web Development Intern — IBM Guadalajara, MX | 2021-07 – 2022-07

- Led the development and maintenance of a critical payment processing module within a 10-module enterprise system handling accountant payroll distribution.
- Identified and resolved critical bugs blocking the end-to-end payment flow, ensuring accurate and seamless payroll execution.
- Authored comprehensive technical documentation across multiple enterprise modules, improving team onboarding efficiency and knowledge sharing.

PROJECTS & OTHER EXPERIENCE

- Fullstack Developer (Social Service) — CFE (Federal Electricity Commission)

2022-08 – 2022-12

 - Developed a unified management web application to automate warehouse and HR operations across multiple facility locations.
 - Built a real-time inventory management module supporting inter-warehouse product requests and stock tracking.
 - Implemented an employee self-service portal for vacation requests featuring automated administrative approval workflows.

- Interactive CV Website — Personal Project

2025-02 – 2025-05

 - Designed and developed an interactive CV web app ([eslavi-cv.vercel.app](#)) using Astro, Svelte, and React to showcase modern frontend techniques.
 - Leveraged Astro’s static site generation (SSG) and component island architecture to achieve fast page loads and seamless UX.
 - Configured automated continuous deployment pipeline via GitHub and Vercel.

- Open Source Developer — BlueXolo

2019-01 – 2021-12

 - Contributed to an open-source test automation tool, building user interfaces for creating automated test cases with Robot Framework and Selenium.
 - Collaborated with IBM engineering teams to design UI workflows that simplified automated testing setup for QA teams.

EDUCATION & BACKGROUND

- Bachelor’s Degree in Computer Science Engineering — Universidad de Guadalajara (CUCEI)

2018-08 – 2022-12

LANGUAGES & SOFT SKILLS

- Languages: English (Advanced C1), Spanish (Native)

Soft Skills: Problem Solving, Performance Mindset, Teamwork, Adaptability
